The Perfect Cleaning Tool for the Foodservice Industry

DURABLE:
Made from heavy-duty microfibre cloth

HIGH HEAT INSULATION:
Clean and handle surfaces up to 160°C

EASY TO WASH:
Can be washed in a sink or dishwasher

PRACTICAL:
Dries faster than cotton for frequent re-use

Tested and Approved by André Ravella

André was the founder and past president of the American Beverage Institute and has won multiple industry rewards and honours and is a regular speaker and trainer at industry events.

Durable

✔ Works on Multiple Surfaces

- Picks up grease, leaves no surface film.
- Absorbs grease better than cotton cloths.
- Works great on stainless steel, marble, wood and glass.

Easy Washing and Quick Drying

✔ Washable and Reusable

- Use the Chef's Towel at the end of the day for ordinary maintenance and cleanup of ovens, glass, and food prep stations.
- Wash the Chef's Towel in either a three-sink system (wash/clean/rinse) or a conventional dishwasher.

High Heat Insulation

✔ Heat Resistant Up to 160°C

- Grasp and hold hot pans and pot handles.
- The microfibre cloth creates a non-slip grip allowing the user to move kitchenware safely from one place to another.

Eliminates the Need for Rented Cloths

✔ No Need to Store Dirty Rags

- Rented cloths and rags pile up after use. Dirty bags of used cotton rags are unhygienic.
- Dirty rags create foul odours and become a feeding destination for cockroaches and other insects.
